

Clinical Practice Change Alert

March 30, 2015

REQUESTS for MOLECULAR TESTING

In an effort to provide timely and accurate patient results, we request that samples requiring hematopathology molecular testing arrive in the Hematopathology Laboratory as soon as possible. This is especially critical on Fridays, when samples should arrive no later than 11:00 a.m. The molecular Hematopathologist on-call will be consulted regarding acceptance of any samples arriving after 11:00 a.m. on Friday.

Please refer to the Laboratory Information Manual (LIM) located under the Medical Practitioners tab on the DSM website for additional information regarding collection and transportation of samples.
